

PROFESSIONAL SUMMARY

Senior Frontend Engineer and team lead with 8 years of experience shipping SaaS products across React, Vue, and Angular, backed by production Node.js and ASP.NET Core on the server. Currently lead 4 engineers modernizing a legacy AngularJS platform with micro-frontends and a Next.js AI assistant (OpenAI + MCP) that cut support tickets by 30%. Previously built UI systems at Insider used by 15 product squads and embedded in 2,000+ customer websites serving millions of daily requests.

SKILLS

Languages

TypeScript, JavaScript (ES6+), C#, Python, HTML5, CSS3, SQL

Frontend

React, Next.js, Vue 3, Nuxt, Angular, AngularJS, Redux, Pinia, RxJS, Web Components, Shadow DOM, Responsive Design, Accessibility (WCAG)

Backend & API

Node.js, NestJS, Express, ASP.NET Core, REST, GraphQL, Model Context Protocol (MCP)

Testing

Jest, Vitest, Cypress, Playwright, Selenium, Testing Library, Unit / Integration / E2E

Cloud & DevOps

AWS (Lambda, EC2, S3, SQS), Docker, Kubernetes, CI/CD, Git, GitHub Actions

Data

MySQL, MongoDB, Caching (Redis-class), Data Modelling

Practices

Design Systems, Micro-Frontends, Web Performance, AI-Assisted Workflows, Agile / Scrum, Code Review, Technical Mentoring

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer & Team Lead

Aug 2024 – Present

F4E

Remote

- Lead a team of 4 engineers modernizing a legacy AngularJS platform (8 business modules, ~70 files each) through micro-frontends and a shared design system, with zero customer-visible downtime during migration.
- Architected and shipped a self-contained Next.js AI assistant embedded inside the legacy application (OpenAI + Model Context Protocol) — reduced inbound support tickets by 30%.
- Introduced automated test coverage from 0% to 30% by leveraging AI, and cut manual code-review time almost entirely by delegating routine PRs to AI while reserving human review for critical changes.
- Mentor engineers, run technical interviews, and contribute to product strategy and technical roadmap.

Technologies: Angular, AngularJS, Next.js, React, TypeScript, ASP.NET, OpenAI API, MCP, Micro-Frontends, Design Systems

Freelance Frontend Engineer

2024

Independent

Remote

- Delivered a production chatbot for a no-code project management platform in modern Angular, backed by a custom Model Context Protocol (MCP) server — shipped from specification to deployment in 3 weeks as sole engineer.
- Designed the LLM tool-calling contract end-to-end so the client's domain data could be safely exposed to an AI model without leaking sensitive context.
- Owned architecture, UI, streaming responses, authentication, and CI pipeline.

Technologies: Angular, TypeScript, Node.js, MCP, OpenAI API, RxJS, CI/CD

Frontend Engineer → Senior Frontend Engineer

May 2018 – Jun 2024

Insider

Istanbul, Turkey (Remote from 2020)

- Progressed through five roles over six years: QA Engineer → JavaScript Developer → Operation Technical Advisor → Frontend Engineer → Senior Frontend Engineer.
- Shipped SaaS embedded directly into 2,000+ customer websites worldwide, serving millions of requests per day.
- Built and owned reusable UI components in Vue and React, adopted by 15 product squads and eliminating duplicated work company-wide.
- Cut bundle size by 20% through dynamic imports and smarter component composition.
- Established 100% unit-test coverage and 80% integration-test coverage across owned modules (Jest, Cypress, Playwright).
- Deployed and operated services on AWS (Lambda, EC2, SQS, S3) with MySQL and MongoDB behind Node.js, NestJS, and Express APIs.

Technologies: Vue, React, TypeScript, JavaScript, Node.js, NestJS, Express, AWS, MySQL, MongoDB, Kubernetes, Jest, Cypress, Playwright, Selenium

SELECTED PROJECTS

Gridwright

Infinite graph-paper canvas for sketching — pan, zoom, and draw on a grid that never ends. Vanilla JS + Canvas. [ozdemir-yaman.github.io/gridwright](https://github.com/ozdemir-yaman/gridwright)

Tetris

Classic Tetris built in pure JavaScript with a hand-rolled virtual DOM for maximum render performance. [ozdemir-yaman.github.io/Tetris](https://github.com/ozdemir-yaman/Tetris)

Shadowcn

shadcn-style component library built on Shadow DOM so it drops into any framework — targeted at teams stuck on legacy stacks (in development).

LANGUAGES

Arabic — Native English — C2 (Proficient) Turkish — B2 (Upper Intermediate)
